

# Srinath M

## Front End Web Developer

Phone - 9087793989

Mail - [srinath.webtech@gmail.com](mailto:srinath.webtech@gmail.com)

Location - Chennai

## EXPERIENCE

### Front End Developer

#### Xerago E-Biz Services Private Limited

📅 2021 - Present 📍 Chennai

#### Project : CITI Bank

##### Role and Responsibilities

- Developed and maintained reusable and modular React components that can be easily integrated into different parts of the application. Ensure consistency and scalability of components across the application.
- Utilize state management libraries like Redux or context API to efficiently manage the state of the application, enabling seamless data flow and synchronization between components.
- Implemented client-side routing using React Router within a single-page app.
- Optimize performance using techniques like lazy loading and code splitting.
- Troubleshoot and debug complex issues to maintain smooth application functionality.
- Worked with Tailwind CSS and responsive UI design with CSS.

## PERSONAL PROJECTS

### YouTube Clone

<https://youtube-clone-srinath.netlify.app/>

Skills Used :

**ReactJS**

A clone of YouTube website with routing and RapidAPI integration. It has features like watching videos, personalized recommendations, related videos and a search bar. It also displays relevant video data such as views, likes, and comments. Used basic hooks such as useState and useEffect to manage state and render data dynamically.

### Swiggy Clone

<https://swiggy-clone-srinath.netlify.app/>

Skills Used:

**ReactJS , Redux**

A food ordering website like Swiggy that uses the real time data provided by Swiggy API. It includes features like search restaurants, rating of each restaurant and it's dishes, functionalities like add, remove and clear cart and displaying the total amount at checkout. Used Redux for state management which includes functions like action, dispatch handled by hooks like useReducer, useContext.

### Amazon UI

<https://amazon-clone-srinath.netlify.app/>

Skills Used:

**HTML , CSS , JavaScript**

A responsive and user-friendly website built using flexbox that focuses on the UI design of Amazon's website. It showcases high-quality product images, clear product categories, and concise product descriptions.
